AZ910
DSNG and Contribution Demodulator
Azimuth Product Family

Description

The AZ910 is a state-of-the-art satellite demodulator designed for broadcast contribution, Digital Satellite News Gathering (DSNG) and Primary distribution applications over satellite in full compliance with the DVB standards.

In its default configuration, the AZ910 is capable to demodulate one MPEG transport stream in DVB-S, DVB-DSNG or DVB-S2 mode and to interface with terrestrial broadcast network through a standard ASI interface. Optionally, an optical ASI interface can be added.

To simplify the migration towards IP, the AZ910 is also available with DualFlow™ (combined ASI+Ethernet interface), providing broadcasters the following capabilities:

- The ability to demodulate Multistream and VCM carriers, and to output up to two transport streams and one IP stream simultaneously.
- The ability to interface (via a GbE output) with equipment or networks that accept transport streams carried over IP with the RTP protocol.
- The ability to receive IP services (file transfers, VoIP, TCP services…) simultaneously or alternatively with transport stream(s). In this case the demodulator also performs the extraction of the IP packets encapsulated in MPE or XPE mode.

The AZ910 has a dual L-band input (950-2150 MHz). The active input is selected by the user and can provide DC power and frequency band selection signals compatible with most professional and commercial LNBs. Optionally, one L-band input can be replaced by an IF (50-180 MHz) input.

The AZ910 is equipped with an adaptive equalizer to compensate linear distortion of the transmission channel.

To protect the satellite transmission, the BISSM or AES option can be activated. BISSM descrambles a BISSM scrambled multiple program transport stream. AES decrypts the content of all streams of an AES encrypted DVB-S2 transmission. When activated, the per-stream mode allows to decrypt up to four S2 streams with individual keys.

The integrated Noise & Distortion Estimator tool provides an accurate reading of the satellite link margin even in presence of non-linear distortion and allows the user to find the optimum input back-off setting very easily for 16APSK or 32APSK operation, whether or not non-linear predistortion is applied.

Clean Channel Technology™ is available on the modulator as an option. Clean Channel Technology™ further improves satellite efficiency by up to 15% compared to the current DVB-S2 standard. Newtec’s customers will be able to immediately benefit from Clean Channel Technology, as it is available as a software field upgrade for existing Newtec equipment.

Key features

- DVB-S2 and DVB-DSNG/S compliant
- QPSK, 8PSK, 16APSK and 32APSK
- Data rates up to 155 Mbit/s
- Adaptive equalizer
- Noise & Distortion Estimator (NoDE) tool
- Optional DualFlow™: ASI + GbE interfaces with integrated IP decapsulator
- Support of Multistream and/or VCM operation
- Optional BISSM decrambling or AES decryption
- Optional 10 MHz reference input/output
- ISSY compliant
- Clean Channel Technology™

Main advantages

- Lower operational cost thanks to highest bandwidth efficiency
- Fully compatible with the satellite DVB standards for a guaranteed interoperability
- High versatility and flexibility
- Future proof design combining video and IP technologies
- High compactness

Applications

- Contribution
- Primary distribution
- DSNG
- Professional signal monitoring

Specifications – AZ910(R9)

Input interface

Dual L-band input (default)
- Connector: 2 x F-type (F), 75 ohms
- Return loss: > 7 dB
- Level: -65/-250 dBm
- Frequency: 950 - 2150 MHz
- Adjacent signal < (Co+7) dBm

IF-band input (optional, replaces one L-band input)
- Connector: BNC (F) - 75 ohms
- Return loss: > 15 dB
- Level: -55 to -15 dBm
- Frequency: 50 - 180 MHz
- Adjacent signal < (Co+7) dBm

LNB power and control
- max. current: 450 mA (on selected IFL input)
- voltage: 11.5 -14 V (Vertical polarization)
- 16-19V (Horizontal polarization)
- & additional 22 kHz +/- 4kHz (band selection according to universal LNB for Astra satellites)
- 10 MHz reference

Demodulation

Supported modulation schemes and FEC
- Advanced filter technology
- Optimum carrier spacing
- Roll-Off: 5% - 10% - 15% - 20% - 25% - 35%

Baud rate range
- DVB-S2
  - QPSK/16APSK/32APSK - 256 – 45 Mbaud
  - QPSK/32APSK - 1-33 Mbaud

Baud rate range
- DVB-S
  - QPSK/16APSK - 0,256 – 45 Mbaud
- 16APSK - 1-33 Mbaud

Frame length
- DVB-S2 Short Frames*** 16200 bits
- DVB-S2 Normal Frames 64800 bits
- DVB-S2/DSNG 188 bytes

Roll-off factor
- 20% - 25% - 35%

Clean Channel Technology™
- Roll-Off: 5%-10%-15%-20%-25%-35%
- Optimum carrier spacing
- Advanced filter technology

Output interfaces

ASI interface (default)
- ASI (Asynchronous Serial Interface): (BNC (F) - 75 ohms (coax) or optionally ST (optical)
- 188 byte mode
- SPI interface
- 25 pin sub-D connector
- 188 byte mode
- BISSM: mode 0, 1 and E (optional)
- BISSM does not modify PSI/SI tables. It can descramble any BISS-compliant scrambled stream, but the output will have PSI/SI tables still containing CA descriptors and CAT
- AES 64 bit decryption (optional)

DualFlow: Combined ASI-Ethernet (optional)
- 2 x ASI on BNC (F) - 75 ohms (coax)
- 188 byte mode
- Auto switching 10/100/1000 Base-T Ethernet interface
  - Transport stream on IP interface (UDP/RTP)
  - Layer 2 bridge mode: Ethernet frames over satellite (data piping)
  - Layer 3 bridge or router mode: IP packets over satellite using Multi Protocol MPE or Extended Performance (XPE) Encapsulation
  - Processing of up to 40 000 IP packets per second – maximum 50 Mbit/s
- DVB-S2 Multistream and VCM support
- AES 64 bit decryption (optional)

10 MHz reference input / output (optional)
- Connector BNC (F) – 50 ohms
- Input level -3dBm up to 7dBm
- Output level +7dBm

Internal Reference frequency
- Very High Stability (optional)
- Stability ±2x10^-9 over 0°C to 65°C
- Ageing: ± 0.5 ppb/day
- ± 500 ppb/10 year

Generic

Monitor and control interfaces
- Web based GUI
- Diagnostics report, alarm log (HTTP)
- RMCP over TCP/IP/UDP and RS232/RS485
- SNMP V2C

Alarm interface
- Electrical dual contact closure alarm contacts
- Connector 9-pin sub-D (F)
- Logical interface and general device alarm

Physical
- Very compact: 1RU, width: 19”, depth 51 cm, 6 kg
- Power supply: 90-130 & 180-260 Vac, 105 VA, 47-63 Hz
- Temperature:
  - Operational: 0°C to 40°C
  - Storage: -40 to +70°C
- Humidity: 5% to 85% non-condensing
- CE label
